Discover What's Possible.

## Infrastructure as a Service (IaaS)

### Transfer Your Data to the Cloud with Infrastructure as a Service

Infrastructure as a Service (IaaS) seamlessly transitions your data and systems to the secure SDV cloud, eliminating the need for hardware and proactively setting up your business for the future.

#### Benefits of IaaS:

- Allows your organization to refocus on their core mission while having full confidence the system is working and data is available when it is needed
- Supports a single server or up to hundreds of servers as your requirements and needs evolve
- Includes backup and disaster recovery requirements, allowing you one service provider for all of your system and data needs
- Ensures around-the-clock support 24/7/365 from U.S.-based support teams
- Offers flat monthly fee with no hidden charges
- Provides all-inclusive service monitoring, software maintenance and support of the infrastructure

#### Organizations That Need IaaS:

- Wants to stop overbuying or constantly replacing and upgrading hardware to run mission critical applications
- Does not want to dedicate internal resources to design, build and maintain the infrastructure required to run the mission critical applications and systems for the organization
- Wants predictable monthly costs
- Has data compliance requirements

### Discover What's Possible with Sky Data Vault

Sky Data Vault collaborates alongside customers within all verticals and industries to manage and support cloud-based solutions designed to empower growth, improve efficiency and inspire success.
