

Hybrid Disaster Recovery as a Service (DRaaS)

Streamline Your Business with Hybrid Data Recovery as a Service

Hybrid Data Recovery as a Service (DRaaS) recovers entire systems and software along with mission critical data from a local SDV managed appliance or in the secure Sky Data Vault cloud within minutes.

Benefits of DRaaS:

- Eliminates downtime in the case of a server outage
- Allows your organization to refocus on their core mission while having a team of experts at the ready
- Provides access to data from both local appliance and cloud locations
- Provides free initial testing and scheduled annual testing without service interruption
- Ensures around-the-clock support 24/7/365 from U.S.-based support teams
- Offers flat monthly fee with no hidden charges
- Provides all-inclusive service monitoring, software maintenance and support

Discover What's Possible with Sky Data Vault

Sky Data Vault collaborates alongside customers within all verticals and industries to manage and support cloud-based solutions designed to empower growth, improve efficiency and inspire success.

Organizations That Need DRaaS:

- Cannot afford downtime and need whole systems to turn on in the event of an outage
- Has a physical or virtual local server environment that requires a local recovery point
- Does not want to dedicate internal staff to build, maintain and test a recovery system
- Does not have the time, staff or expertise to respond to a mission critical outage or emergency
- Wants predictable monthly costs
- Has data compliance requirements
