SDV BaaS with Veeam: Offering a Range of Solutions

Sky Data Vault with Veeam provides versatile data protection solutions, including BaaS, DRaaS, and CDP, tailored to your specific backup and recovery requirements. Whether you use them individually, or in combination to meet your organization's requirements, each solution has its own benefits and use cases.

SDV BaaS w/Veeam

This service is a cloud-based solution that lets you backup your data to a secure and reliable cloud storage provider. You can use Veeam BaaS to back up your physical, virtual, or cloud-based workloads, such as servers, desktops, laptops, applications, databases, and more. Using the secure SDV Cloud as your BaaS provider means you can have full confidence in the ability to recover your data without the headache of monitoring, managing, and maintaining the service on a day-to-day basis. You also eliminate cost variance as SDV provides transparent, flat monthly fees with no Egress charges to ensure your budget stays intact!

- Reduce backup costs and complexity by eliminating the need for on-premises backup infrastructure and management.
- Improve your backup performance and reliability by leveraging the scalability and availability of the secure SDV Cloud.
- Enhance your backup security and compliance by encrypting your data in transit and at rest, and by choosing the secure SDV Cloud to store your backups.
- Restore your data quickly and easily from the cloud to any location, using Veeam's granular and flexible recovery options.

BENEFIT	BaaS	DRaaS	CDP
File and folder level recovery	X	X	X
Server level recovery		X	X
Sub 30 minute spin up of last backup		X	X
