Google Workspace Backup

Enterprise-Grade Protection for your Business-Critical Data

Many organizations mistakenly believe Google Workspace provides adequate data protection, but the reality is far different. Google automatically deletes end-user Drive files and emails from the trash folder after just 30 days, and Workspace administrators have *only 25 days* to restore items before they're *permanently lost*.

The Sky Data Vault Google Workspace Backup service delivers comprehensive protection with the added value of 24x7x365 US-based support — giving you complete control and peace of mind for the collaborative tools your teams depend on daily.

KEY TECHNICAL CAPABILITIES	INCLUDED
<p>Ransomware Recovery</p> <p>Defend against evolving threats with backups protected by military-grade encryption and automated, multiple-daily snapshots. Immutable storage prevents tampering even if attackers compromise admin credentials.</p>	 
<p>Granular Restore Options</p> <p>Restore a single email, an entire mailbox, or your complete email ecosystem. Enhanced search and filtering capabilities let you pinpoint exactly what you need—whether it's a document from six months ago or a calendar entry deleted by mistake.</p>	 
<p>Automated Backup Schedules</p> <p>Customize protection frequency to match business requirements. Standard configurations include 3x daily backups with configurable retention policies from 30 days to 7 years. SDV manages schedule optimization based on your data change rates.</p>	 
<p>Unlimited Storage with Incremental Efficiency</p> <p>No storage caps or per-GB charges. Incremental backups capture only changed data, dramatically reducing backup windows and accelerating restores. Our deduplication technology minimizes storage footprint without sacrificing recovery speed.</p>	 
<p>Centralized Management Dashboard</p> <p>Single-pane-of-glass visibility into all backup operations. Monitor backup health, track storage consumption, manage user permissions, and initiate restores—all through an intuitive web console. SDV provides regular health reports and quarterly business reviews.</p>	 

Protected Applications Include: Gmail (emails, labels, chat history), Google Drive (My Drive files, folders, labels), Shared Drives (files, folders, permissions), Contacts, Calendars, and Tasks. And **coming soon:** Groups (group emails, settings, organizational units) and enhanced Chat backup (1:1 messages, group messages)
